

JOB ATTACHMENT

Being aware that practical skills are essential in the country our trainees are sent for job attachment to the public and private sector in order for them to acquire more practical insight and be prepared for the job market and self employment. This happens in fruitful cooperation with business partners as well as government institutions.

LIFE AT THE CENTRE

Accommodation: The centre provides dormitories where trainees stay in shared room. The trainees are responsible for taking care of their common place and to keep good standards for a comfortable stay. Trainees should bring their own bedding and toiletry.

Food: The trainees are provided with healthy meals prepared by staff on weekdays. During the weekends students prepare their own breakfast and others meals. This they do through a well-organized group system.

MISSION AND VISION

Vision

To train young people to develop a broad range of vocational skills, knowledge and attitudes that enable them to become entrepreneurs or obtain employment and to become engaged and active in creating a better future for themselves, their families and their communities.

Mission

To deliver quality education in theory and practice in response to national development needs, give students the opportunity to develop to their full potential and contribute to creating a skilled labour force, create active citizens that will contribute to development in the country.

Early Childhood Development (ECD) Teaching level 5

- Grade 12 with a minimum of 22 points in 5 subjects with a D symbol in English.
- Grade 10 with a minimum of 23 points and with 3 years experience in early childhood work.

OTHER ACTIVITIES

We are proud of producing graduates who are practical and down-to-earth experts in their area of study and other activities. We engage students in many activities ranging from students cleaning their own rooms and the centre to taking certain responsibilities in different spheres of centre life such as kitchen, office management, sport and culture events, maintaining furniture and equipment etc.

As the demands on the young people entering the labor market are constantly increasing DAPP Vocational Training School feels obliged to improve on the curriculum and activities in order to offer our trainees the best possible training.

NEW DEVELOPMENTS

In the coming school year we will be adding the following elements:

- Computer literacy for all trainees
- More outreach activities
- Practical projects at the center
- Entrepreneurship training linked to productions
